

# Have you seen this bug?

Believe it or not, some insects can be found in the middle of winter!

We are looking for any observations of these insects to confirm their presence in southwest Colorado.

## Ice Crawlers

*Grylloblatta sp.*

*Grylloblatta bifratrilecta* (Copyright 2009 Joyce Gross)

## Snow Scorpionflies

*Boreus sp.*

*Boreus coloradensis* (Copyright 2022 Toby)

## Snow Flies

*Chionea sp.*

*Chionea sp.* (Copyright 2009 Charlene Wood)

## Winter Crane Flies

Family Trichoceridae

*Trichocera sp.* (Copyright 2006 Tom Murray)

## Springtails

Class Collembola (not insects)

*Hypogastrura sp.* (Copyright 2007 Suzanne Filteau)

## Winter Stoneflies

Family Capniidae

Family Capniidae (Copyright 2024 Thomas Schulz)

## Have you seen any of these snow-loving insects?

Upload your sightings on iNaturalist or email Evan Tweedie at [unconformityrecords@gmail.com](mailto:unconformityrecords@gmail.com)!
